Introduction

I am Jiaqi Ye, a grade-three student in software school of SYSU. I have great passion for software development. I am interesting in web developing and had did some medium projects. And I am also interesting in Embedded Software which makes me have a deeper understanding of the overall structure of the computer.

My Abilities:

Experience

- July 2014: Participation in Software Engineering Training with Case "Agenda Meeting Management System"(c++)
- Jan. 2015 - Future: Design and process YOJ system.
- June 2015: Participation in Database Course Project, simple sinew
- May 2015 - June 2015: Participation in Project Activitee, responsible for the front end and backstage of the system's main function
- July 2015 - Sept. 8, 2015: Participation in IGEM team SYSU-Software as a front page programmer. I am responsible for the team wiki and some other technical problems
- July 2015: Teaching Assistance in Software Engineering Training, responsible for machine test script
- Aug. 2015: Participation in Software Engineering Training with Case "Grid World"(Java)
- Aug. 2015 - Future: Vinzor Cloud Computing Developer, responsible for its software maintenance, the supporting documentation website as well as its test scripts for homework submitting
- Sept. 2015 - Future: Teaching Assitance in C language programming.

Participated Projects

Activitee: An Activity Management System

Description: <http://yejq.sinaapp.com/blog/Activitee>

Project : <https://github.com/ghostbody/Activitee>

YeJQ online Judge System : An ACM online judge system

Description: <http://yejq.sinaapp.com/blog/YOJ>

Project : <https://github.com/ghostbody/YOJ>

IGEM: International Genetically Engineered Machine Competition

(Team:SYSU_Software)

Wiki: <http://2015.igem.org/Team:SYSU-Software>

Project(CORE): <http://core.sysusoftware.info/>

Project Code: <https://github.com/igemsoftware/SYSU-Software-2015>

Simple Sinew : Simple Database System

Description: <http://yejq.sinaapp.com/blog/sinew>

Project : <https://github.com/ghostbody/sinew>

Job Intention

- Embedded Engineer

Adaptability: I am good at c/c++ programming and Linux/Unix sytem(shell and linux kernel). Also, I am very interested in Microcontrollers. I have knowledge about ARM, and have many projects with raspberry pi, ARDUINO.

- Front End Engineer

Adaptability: Have abundant experience about Web page design with the project above. I am Familiar with the web developement tools, e.g. Html, jade, CSS, SASS, Less, JS, LiveScript.

- Software Testing (Automatic Testing)

Have a lot knowledge about automatic testing include random unit test, an some other method using in project YOJ and Vizor

Language Skills
